

Introducing Voice For Microsoft Teams

Deliver Feature-Rich Voice Communications for MS Teams

Whether you are a business looking to deliver easy voice to your MS Teams users, or an ITSP or MSP looking to grow your business into Microsoft environments, Sangoma's Voice for MS Teams is your solution.

Simple and Easy Voice Integration

Instant access to inbound & outbound phone calling capabilities by simply signing up for the service. No hardware to install, configure, or maintain.

Included Ancillary Services

Go ahead and send SMS text messages, get E911 alerts, and use fax to email – They are all included! Unlike other providers, we offer you more than just voice and phone numbers.

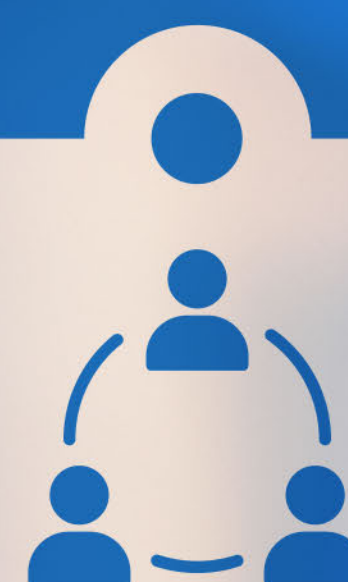

The Most Cost Effective Voice Solution for MS Teams

As a customer of our VI Communication Services, all you need to do is enable Voice for MS Teams within our BackOffice Portal, giving you access at no extra cost! Get quality voice communications for MS Teams, without license or channel costs, hardware, or software.

Share Service across Your MS Teams Users

Don't be forced into buying a calling plan for every MS Teams user. We let you share service across as many or as little of your users with any additional costs.

Trusted Voice Infrastructure

Get your voice from a veteran provider in the communication industry with high reliability, fraud protection, and easy access to 24/7 support if you should ever have any issues.
